

## Your New Hayter

## Mower.....

Please note your new mower has had a PDI (Pre-delivery inspection) completed on it before leaving our warehouse. This means that the mower was removed from the box, assembled, fuelled, oiled, started and tested as per the manufacturers requirements. The oil and fuel were then drained and the mower repacked.

To prepare your mower for use, Please fill the machine with the correct level of oil (SAE30 oil which is supplied in the box) as per the manual and also Unleaded fuel.

## DO NOT TIP THE MOWER ON ITS SIDES!

If you want to access underneath the machine to clean it you need to tip the mower backwards towards it's handles. If you tip it on it's side, you will either flood the exhaust with oil and cause it to smoke heavily or you will contaminate it's air filter and will stop the machine from working. If you do tip it on it's sides and cause either of the two scenarios above, any necessary repairs or costs resulting from this action would not be covered under warranty.

## Warranty

We have registered your mower on Hayter's online warranty registration system, activating the warranty.

Please read the instruction manual carefully to ensure that you are aware of the correct use of the mower and all of the warranty conditions. Your machine warranty will be subject to a specified service schedule with your nearest Hayter service agent. You can find the details of the nearest agent by visiting Hayter's website.

Thank you for making your purchase from Garden Machines and we wish you many seasons of happy mowing!
